This diagram shows a top view of a circular device, likely a disk or a specialized lens. It features a central circular hub (205) with a black dot in the center. Surrounding the hub is a large circular area (202) divided into radial segments by dashed lines. A rectangular component (204) is positioned at the bottom center of the hub area. A small circular feature (206) is located on the left side of the hub. The entire device is enclosed within a rectangular frame (201) with rounded corners. Four corner mounting points (208) are visible, each consisting of a circle with three vertical lines extending from it.
